EDUCATION

Bachelor of Technology (B.Tech), Cs

Future Institute Of Engineering And Management

2018 - 2022

JOBS

Backend Developer

Lazarus Network, Virtual

Apr 2021 - Present

I am working here to develop an app which leverages smart contracts and blockchain to maintain the internet privacy we all crave. Using Fiber as a Go framework in the backend. Here I learnt a lot of things - SSH, Tunneling, etc.

Mobile Developer

Softway Solutions, Virtual

Apr 2021 - Present

I am working here as a mobile developer. I have used Swift, React Native, etc. The most interesting thing I am working on is an app from Daikin (Goodman). It involves BLE, AWS, etc.

Full Stack Development

Dezigndia, Virtual

Dec 2020 - Mar 2021

I was hired as a full stack developer for 2 project => Creatist (an interactive classroom used by government organisations) and Mediseen (a PWA app for pharmacy/pathology and doctors/hospitals, one of many products from doctin.in).

Full Stack Web Developer

Startwithgenesis, Virtual

Dec 2020 - Jun 2021

I was hired for a many small projects working with Go, Polymer (khetibadi.com), CouchDB, etc. My main projects were a KYC submission forum with an admin panel for approval, listing, etc(both front and back) and Shnipp.com's backend on AWS serverless.

Front End Development

Woulbee.com, Virtual

Nov 2020 - Dec 2020

I was hired as front end developer to develop an admin dashboard using React and Redux for a matrimonial startup company. Dashboard functionalities involved showing stats, listing profiles, viewing a profile and accepting or rejecting it.

Customer Support

Viewer Labs, Virtual

Sep 2019 - Aug 2020

I was working as a customer support in a tech company based in UK. There, I was mentored by the company owner who also owned a web development firm.

TRAININGS

Industrial Training

Ardent Technology, Kolkata

Nov 2020 - Present

PROJECTS

Url Shortner in GoLang

Apr 2021 - Apr 2021

https://github.com/iamyxsh/golang-urlShortner

A url shorter written in Golang.

Dictionary App

Dec 2020 - Dec 2020

https://int-dictionary.herokuapp.com/

I made this app using MERN along with Material UI. This apps fetches any new word from the oxford API and caches it locally on a mongoDB database so any subsequent request to that particular word is redirected to database instead of the oxford API.

PayEasy - PWA

Nov 2020 - Nov 2020

https://payeasypwa.herokuapp.com/

This is an e-Wallet Progressive Web App made with React.JS as UI library, Redux as a state-manager, Node.Js in the backend and Express.JS as a node library. I used MongoDB as a database and Mongoose as a data mapper. https://github.com/yash1798

XiNCE - e-Commerce App

Oct 2020 - Nov 2020

https://github.com/iamyxsh/xience

This is a full MERN stack e-com site I made . It is currently not hosted anywhere but you can find the source code on my github.

CRWN - online clothing shop

Oct 2020 - Oct 2020

https://github.com/iamyxsh/crwn

I built this app using Firebase as a backend as service. The frontend was made with React and Redux. The project is not currently hosted anywhere but you can view the source code.

Calculator

Jun 2021 - Present

https://github.com/iamyxsh/iOS-storyboard-calculator

A calculator in Swift for iOS. It is fully responsive and can adjust to any orientation or any device.

Calender App

May 2021 - Present

https://github.com/iamyxsh/go-calender

This is a meeting app (similar to calendly) and the backend is done using Fiber framework in GoLang. I used Kamva MGM as an ODM for MongoDB.

Minutes

Jun 2021 - Present

https://github.com/iamyxsh/minutes

App like Calendly in NestJS (Node). I made this app using TypeScript and Mongoose.

Landing Page with NEXT JS

Apr 2021 - Present

https://github.com/iamyxsh/landing-page

A landing page with NEXT JS and Material UI with SEO.

SKILLS	**ReactJS** Intermediate	**Node.js** Intermediate	
	Redux Intermediate	**Firebase** Beginner	
	MongoDB Intermediate	**Express.js** Intermediate	
	Golang Intermediate	**Materialize** Intermediate
